

Signet 2580 FlowtraMag® Meter

(Smart Phone not included)

The GF Signet 2580 FlowtraMag is a full-bore plastic PVC in line style magnetic flowmeter. The PVC body with titanium or *Hastelloy*® C electrodes has no moving parts, and is two to three times lighter in weight compared to traditional metal magmeters on the market. It is designed for high accuracy flow measurement in short pipe runs, making it an ideal solution for industrial applications where performance and ease of use are important.

The FlowtraMag design is factory calibrated with certificate at $\pm 1\%$ of reading accuracy. It is offered in corrosion resistant materials to provide long-term reliability with minimal maintenance costs. The LED indicators show at-a-glance system status, including normal operation, zero flow and partially filled pipe detection.

The flow meter provides three different outputs; field selectable frequency or digital (S³L) as well as analog 4 to 20 mA. The FlowtraMag is capable of temperature readings of the media using the Signet 0252 Configuration Tool or GF Config Tool Bluetooth® app. The GF Config Tool Bluetooth® app supports iOS and Android for simple on-the-fly user configuration.

These versatile, easy-to-install meters deliver accurate flow measurement in pipe sizes of DN25 (1 in.), DN50 (2 in.) and DN100 (4 in.), optimized for performance in short pipe runs often associated with final effluent lines, well heads and water treatment skids.
