

Smart Valve Positioner for Rotary Valve

Model SVX100/SVX102

OVERVIEW

Model SVX is microprocessor-equipped, electropneumatic smart valve positioner for rotary valves.

The SVX receives a DC current signal from control devices and controls pneumatic valves. In addition to this basic function, the SVX has communication capabilities, automatic configuration program, and self-diagnostics functions that will greatly increase productivity and the efficiency of plant operation.

Calibration, configuration and self-diagnostics can be performed by using a HART communicator. (model SVX102 only)

FEATURES

(1) Easy to use

• Auto setup

The auto-setup function is a fully-automatic configuration program which specifies the actuator and adjusts the zero and span of the rotary valve. The program can be turned on simply from an switch so that adjustments to the rotary valve can be performed quickly and safely in hazardous areas.

(2) Valve diagnostic (for model SVX102, software version 4.9 or later)

Following parameters can be monitored by HART communicator or Control Valve Maintenance Support System "Valstaff".

- Stick Slip
- Cycle Count
- Total Stroke
- Shut-off Count
- Travel Histogram
- Max. Travel Speed.

(3) Flexibility in installation

The models SVX100 and SVX102 are available either as a fork lever type or a stroke lever type to facilitate installation on rotary valves.

• Fork lever type

The SVX can be compactly installed on the upper side of the stem.

• Stroke lever type

The valve stem can be adjusted with a pipe wrench. (For manual operation)

• Direct mounting type

The SVX can be installed to NAMUR cylinder actuator without linkage.

(4) Improving rotary valve controllability

Flow characteristics can be freely set for 16 points, which improves the controllability of a rotary valve that has unique flow characteristics.

(5) Forced fully closed settings

The user can set any input signal value as the low threshold which triggers valve shutoff.

The models SVX100 and SVX102 can be used by connecting the input signal cable (4–20 mA) the same as for the conventional type. Figure 1 shows the wiring for the models SVX100 and SVX102.

List of Features

Item	Function
Forced fully open/closed	The control valve can be fully closed or opened securely when the desired percentage of input signal is reached.
Desired flow characteristics	The relationship between input signal and valve travel that is appropriate for the process can be defined by using a 15-point broken line.

Standard Specifications

Item	Function
Applicable actuator	Pneumatic single and double acting, linear and rotary motion actuator
Input signal	4–20 mA DC
Input resistance	SVX100: 300 Ω typically / 20 mA DC (6 V DC between terminals) SVX102: 400 Ω typically / 20 mA DC (8 V DC between terminals)
Lightning protection	Peak value of voltage surge: 12 kV Peak value of current surge: 1000 A
Flow characteristics	Linear, Equal percentage, Quick opening, Custom user characteristics (15 segments)
Manual operation	Auto/Manual external switch (For single acting actuator only)
Supply air pressure	140 to 700 kPa
Air consumption	10 L/min (N) or less: with steady supply air pressure of 400 kPa and output of 50 %
Maximum air deliver flowrate	250 L/min (N) at 400 kPa
Output balanced pressure	55 $\pm$ 5 % for double acting actuator only
Air connections	Rc1/4 or 1/4NPT internal thread
Electrical connections	G1/2, 1/2NPT or M20 $\times$ 1.5 internal thread
Ambient temperature limits	–40 to +80°C
Ambient humidity limits	10 to 90 %RH
Finish and color	Finish: Baked acrylic Color: Dark blue
Material	Cast aluminum
Weight	1.8 kg (2.2 kg with pressure gauge)
Performance	Accuracy $\pm$ 1%F.S. ($\pm$ 2.5% with custom output characteristics)
	Turning range 50 to 90°
Enclosure classification	JIS C 0920 watertight NEMA type 4X
Configuration tools	HART communicator model 475 (According to need, please update a software and device description files.) Field Communication Software CommStaff model CFS100

Conditions of supply air (JIS C 1805-1 (2001))

Item	Specification
Particles	Maximum diameter 3 μmm
Oil mist	Less than 1 ppm at mass
Humidity of the air supply	The dew point should be at least 10 °C lower than the temperature of this device.

To meet the above specifications for instrument air, install the air purification devices listed below properly in the specified installation location.

Examples of air purification devices

Installation	Air purification device	SMC corporation	CKD corporation
Compressor outlet or main line	Line filter	AFF series	AF series
	Mist separator	AM series	
Terminal device	Mist separator	AM150 or AM250 series	M3000S type

Model Selection

Basic model number

SVX100	Analog signal (4 to 20 mA DC)	Selection					Option		
SVX102	Analog signal (4 to 20 mA DC) HART communication protocol								
Structure	Standard	X							
Connection	Electrical connection	Air piping connection		Mounting thread					
	G1/2	Rc1/4		M8		G			
	1/2NPT	1/4NPT		M8		N			
	1/2NPT	1/4NPT		5/16-18UNC		U			
Finish	Standard finish					S			
Feedback lever type	Fork lever type					R	X		
	Stroke lever type					S	X		
	Direct mounting type					D	X		
Pressure gauge joint	No selection						X		
	With T type joint *4						T		
Supply air pressure type	No pressure gauge *5						X		
	200 kPa (Supply air pressure: 130≤Ps≤150 kPa) *4						1		
	400 kPa (Supply air pressure: 150≤Ps≤300 kPa) *4						2		
	600 kPa (Supply air pressure: 300≤Ps≤450 kPa) *4						3		
	1000 kPa (Supply air pressure: 450≤Ps≤700 kPa) *4						4		
Pressure units	No selection *5						X		
	kPa *5						A		
	(kgf/cm ²)*1 *5						B		
	MPa *5						C		
	bar *5						D		
	(psi)*1 *5						E		
Option	No selection							X	X
	For single acting actuator (with plug for OUT2) *2							P	D
	With mounting bracket *3							B	A
	With NAMUR joints for direct mounting type *6							M	D

*1. No domestic sales in Japan due to Non-SI unit.

*2. In case of using the device as a single acting actuator, close the output air pressure connecting plug (OUT2). (The device cannot be used when the output air pressure plug (OUT1) is closed.)

*3. Please select a mounting bracket model (model SVA).

*4. In the case of selecting the pressure gauge, select with T type joint in pressure gauge joint.

*5. In the case of selecting "No pressure gauge" in "Supply air pressure type", select "No selection" in "Pressure units".

*6. Please select a "code D - Direct mounting type (For rotary valves)" as shown in selection "Feedback lever type".
